

wildroman.com

TARGET	https://wildroman.com/	CAPTURED	July 31, 2026 at 7:28 PM
CAPTURE WINDOW	3.00s after page load	PAGES SCANNED	home · product · collection · cart
VANTAGE	Scan vantage: California, US (exit IP 98.255.137.146)	TRACKER DATABASE	DuckDuckGo Tracker Radar (TDS build) – 3,114 trackers
EVIDENCE	20260731-192837-82cda9-home.har, 20260731-192837-82cda9-product.har, 20260731-192837-82cda9-collection.har, 20260731-192837-82cda9-cart.har		

Pre-consent capture only. Clean browser profile (no cookies, no storage) — no consent was or could have been given during the capture window. This scan does not test the consent banner's decline flow.

VERDICT

1 known tracker transmitted data before any consent was or could have been given. None carried stored identifiers — cookieless transmissions still include the visitor's IP address and page URL. 2 more tracking scripts loaded without observed data transmission.

0
high — fired with identifiers or customer data

1
moderate — data transmitted, cookieless

2
info — script loaded, no transmission observed

Capture timeline — when each tracker first fired after page load

	0s	1s	2s	3s	
Klaviyo					2.22s
Shopify					2.17s
9gtb.com					5.20s
gorgias.chat					2.21s
9gtb.com					2.21s
gorgias.help					2.21s
shopmy.us					2.24s
juniphq.com					10.13s
govx.com					10.13s
superfiliate-cdn.com					10.13s

How to verify this yourself

1. Open a fresh incognito/private window with all extensions disabled. A normal browser profile is not a clean context — it carries existing cookies and prior consent state.
2. Open the DevTools Network tab **before** navigating, and enable “Preserve log”.
3. Load the page, then filter the request list by a tracker domain from a finding below (e.g. facebook.com).

Regional tag rules can change what fires — a scan from a different location may not match this report's vantage.

Findings (3)

First fired 2.22s after page load, before any consent interaction was possible. Categories: Ad Motivated Tracking, Advertising, Analytics, Audience Measurement, Embedded Content.

Seen on home · product · collection · cart

No stored identifiers detected — cookieless ping. Still transmits the visitor's IP address and page URL pre-consent.

Accessibility / WCAG — Stage 1 (320)

Stage 1 automated scan only — axe-core and HTML_CodeSniffer findings, deduplicated per page by WCAG success criterion and DOM selector. No AI judgment (Stage 2) or human review (Stage 3) has been performed; automated tools catch roughly 30-40% of WCAG issues. This is not a compliance guarantee.
